1.1 Project Title

Online Web Based Digital Transformation Business System for P.R.F SEA FOOD PRIVATE LIMITED

1.2 Project Background

The fishing industry is an industry that has been around for a long time. With the globalization of the world, domestic and foreign trade began to expand. As a result, bait production used in the multi-day fishing industry did not take place adequately in Sri Lanka. Therefore, it had to be imported and distributed from foreign countries. P.R.F Sea Food Company is one of the leading importers and distributors in the country. We are creating this web base system at the request of the P.R.F seafood company.

The project is a system for P.R.F Sea Food Private Limited in Chilaw. This project explores an Online Web Based Digital Transformation Business System which can Logging to the system, Access to the system, Get items details, order and sell items etc.

Currently this Sea Food Company is using a manual system. So, customers get details about bait items, check availability of item, get payment details, doing payments, ordering and selling items in manual way. Because of that reason, they asked us to suggest a suitable way to carry on this business in a formal manner. Considering all their requirements (uses and facts), we suggest them an online web based digital transmission system.

Using this online system, registered customers and clients get more benefits. They are reduce operational cost, saving time, saving document cost, less man power and get efficient process 24*7.

1.3 Project Aims and Objectives

Aims :

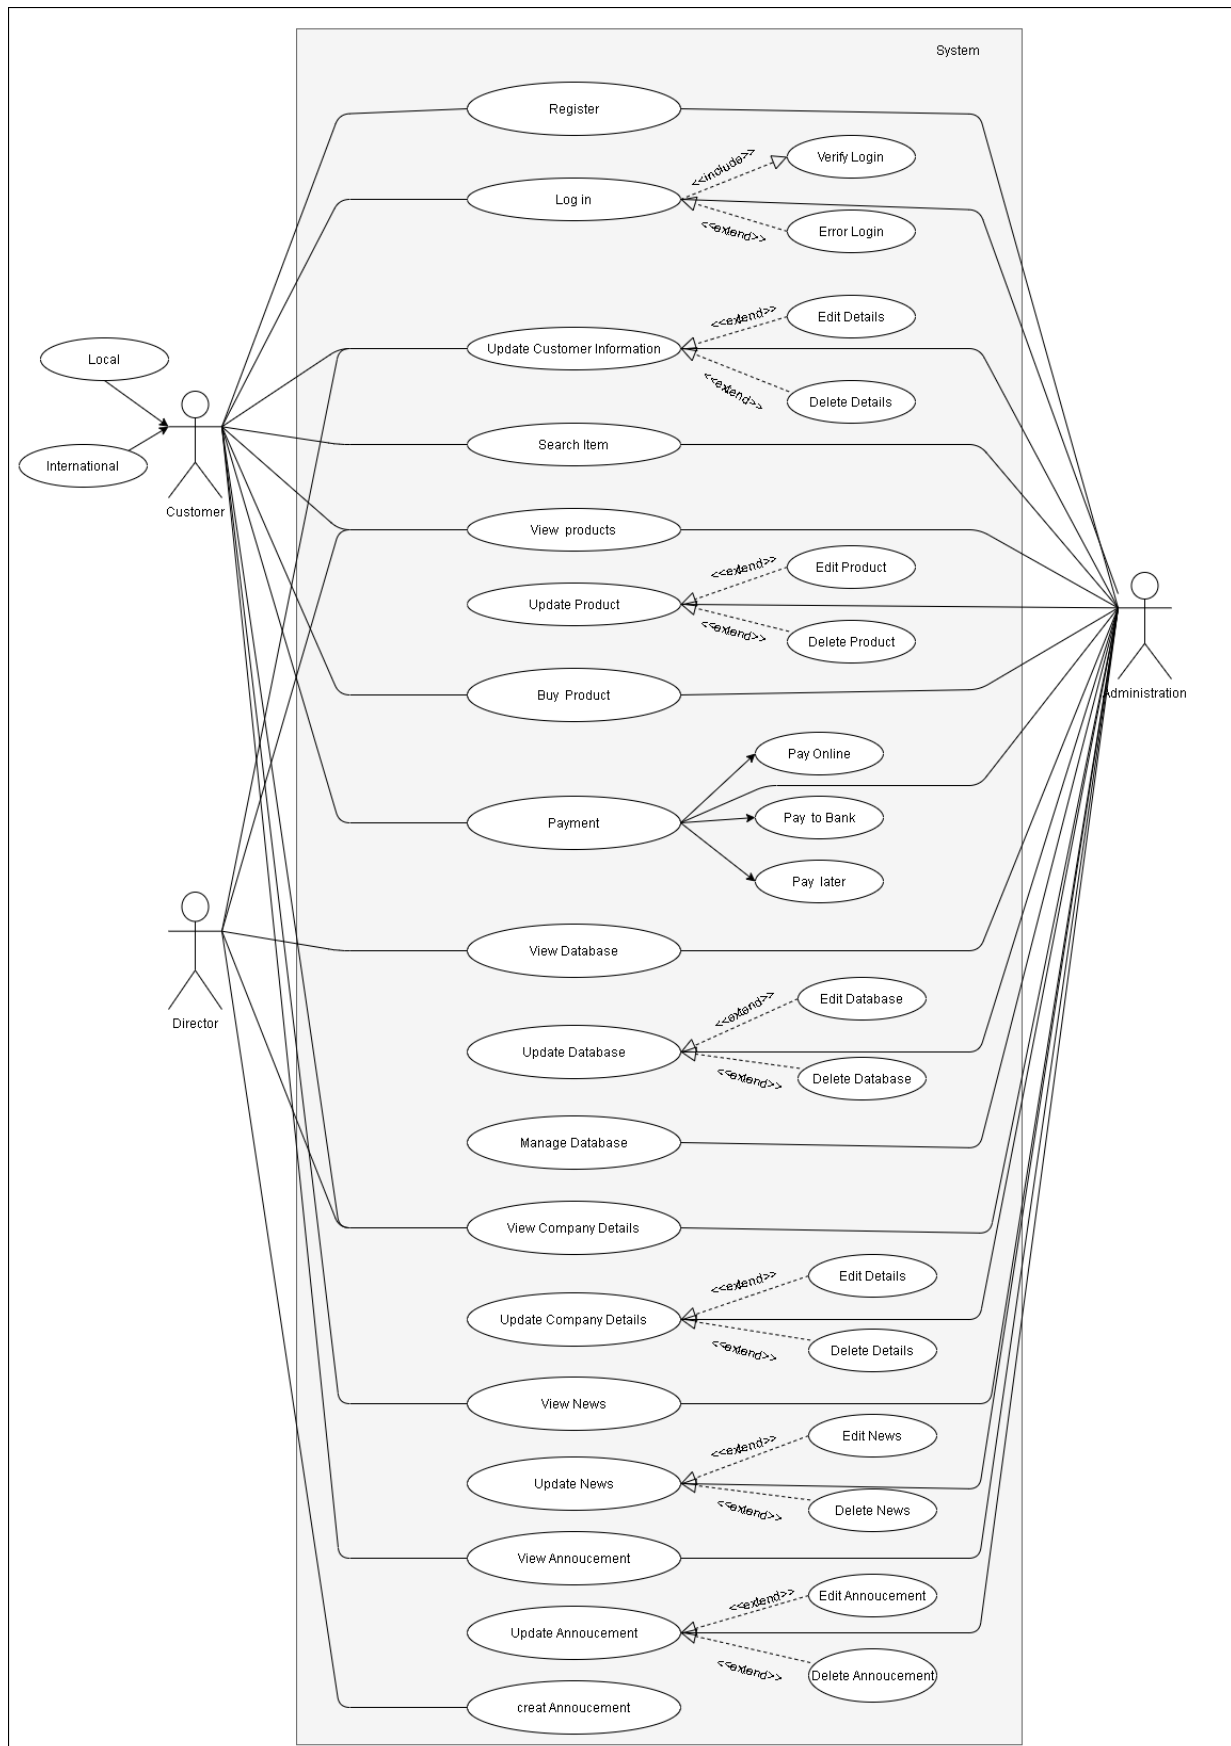

The main purpose of this online web-based digital transformation business system is, to create a system that is,

- More efficient
- Accurate
- Easy to use
- Easy to understand for our clients

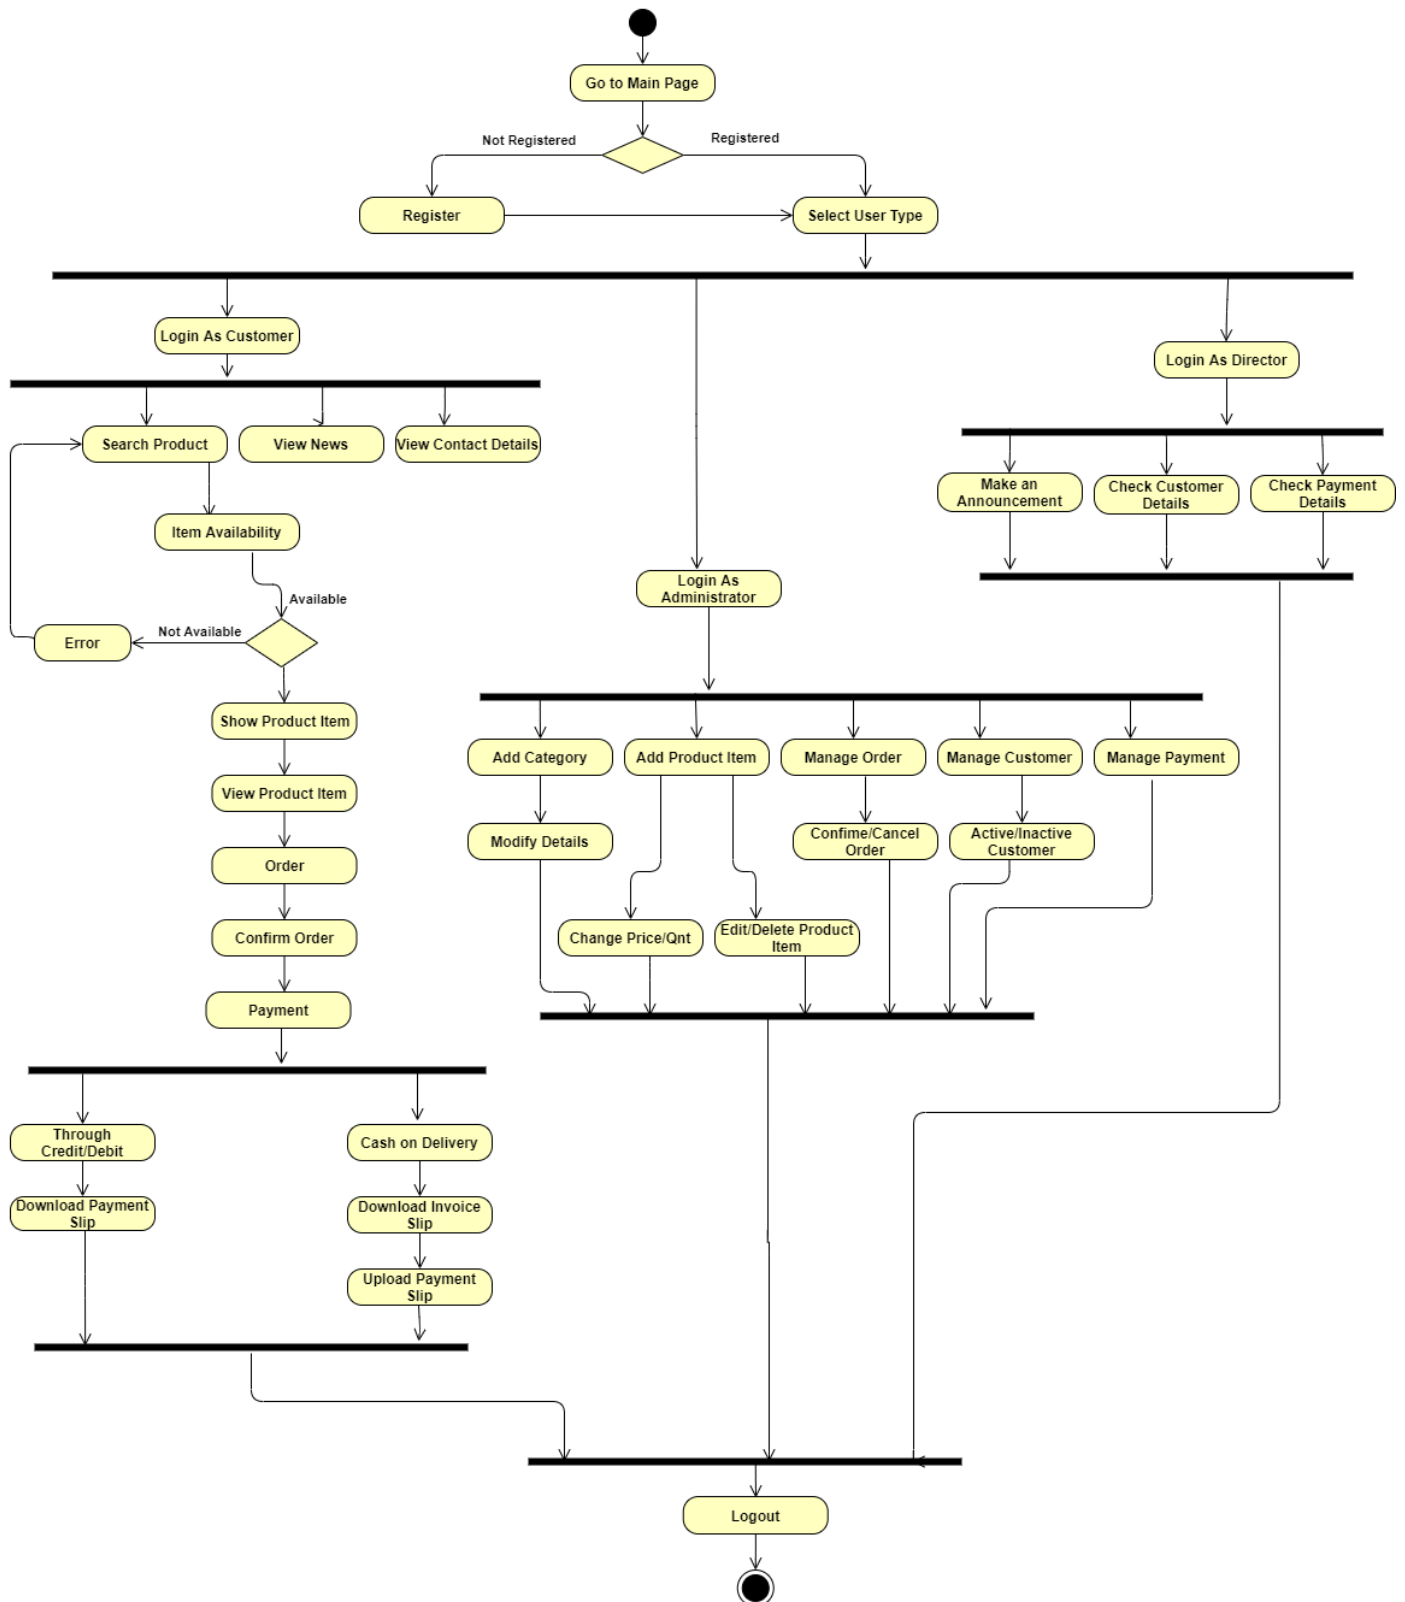

Objectives:

- To develop system that will use visual techniques to give details of and Display.
- To develop a system that would all customers to get information about bait products.
- Customers can create their accounts, doing online payments and manage their business activities.
- Administration can access to the system and view customer details, view payment details, keep announcements, put some information to customers and also maintain the system.
- Ensure the user satisfaction because of the efficient system there.

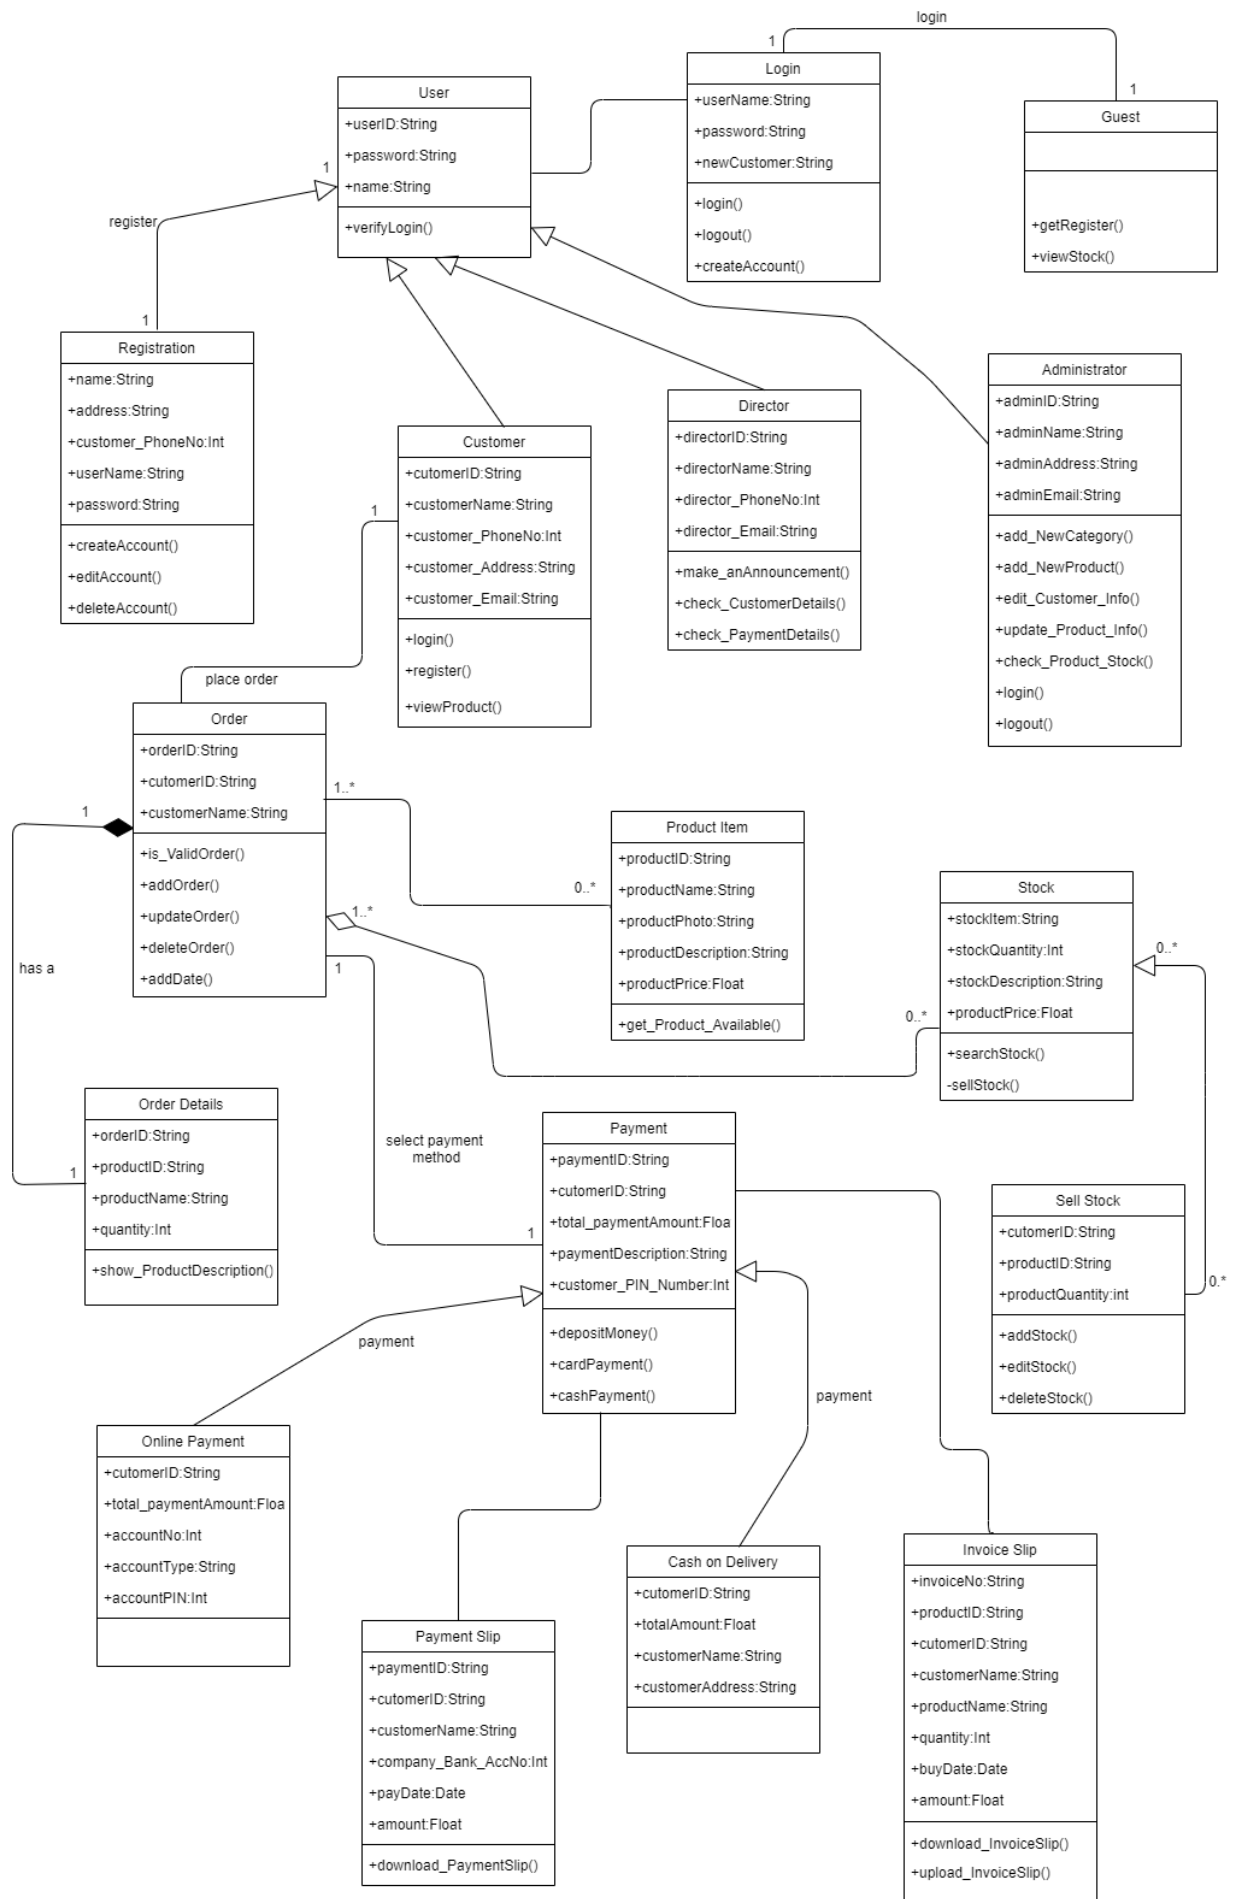

2.1 Use case Diagram

2.2 Activity Diagram

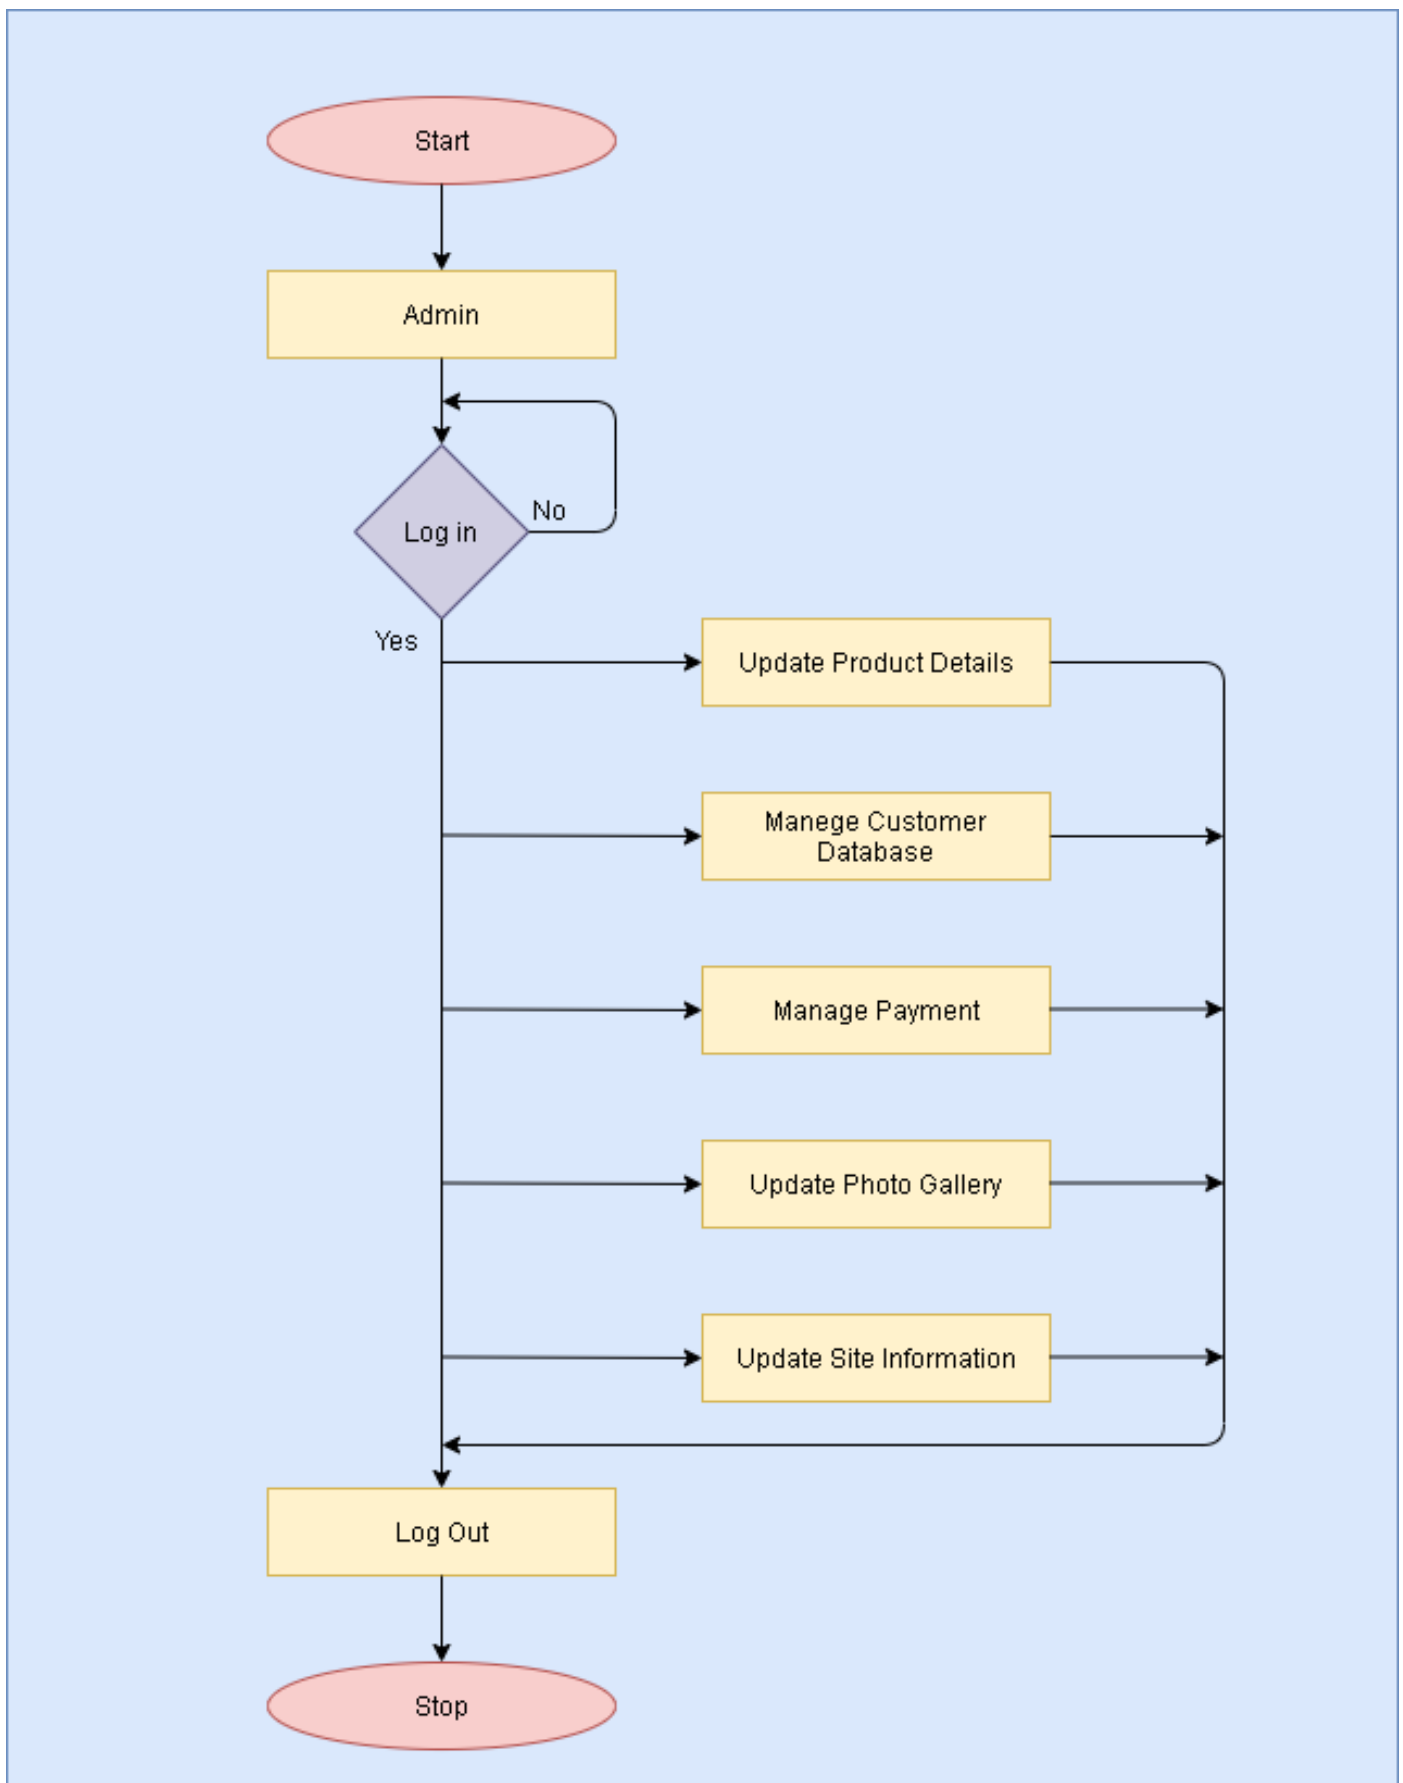

2.3 Class Diagram

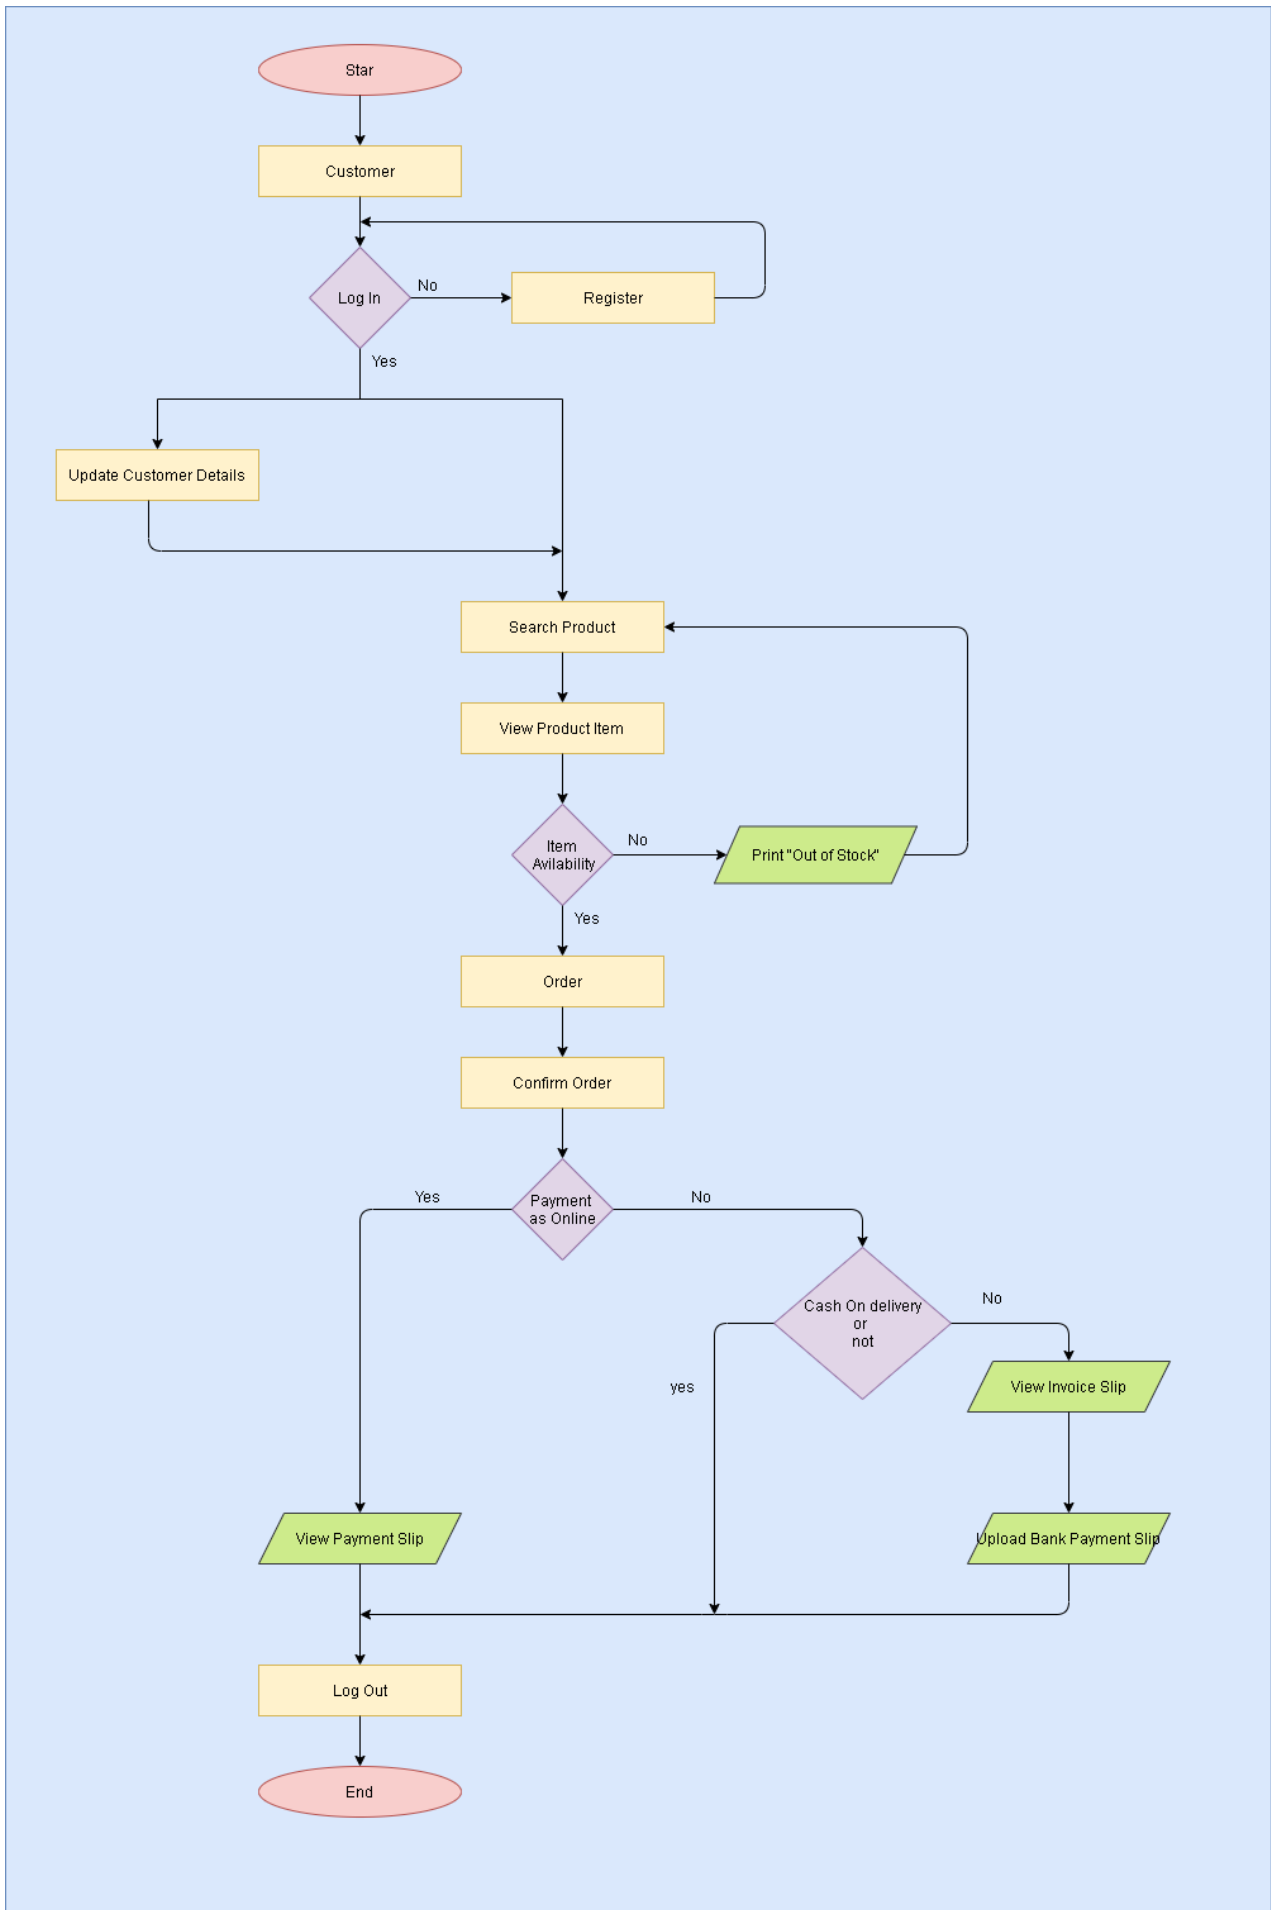

2.4 Flow Chart

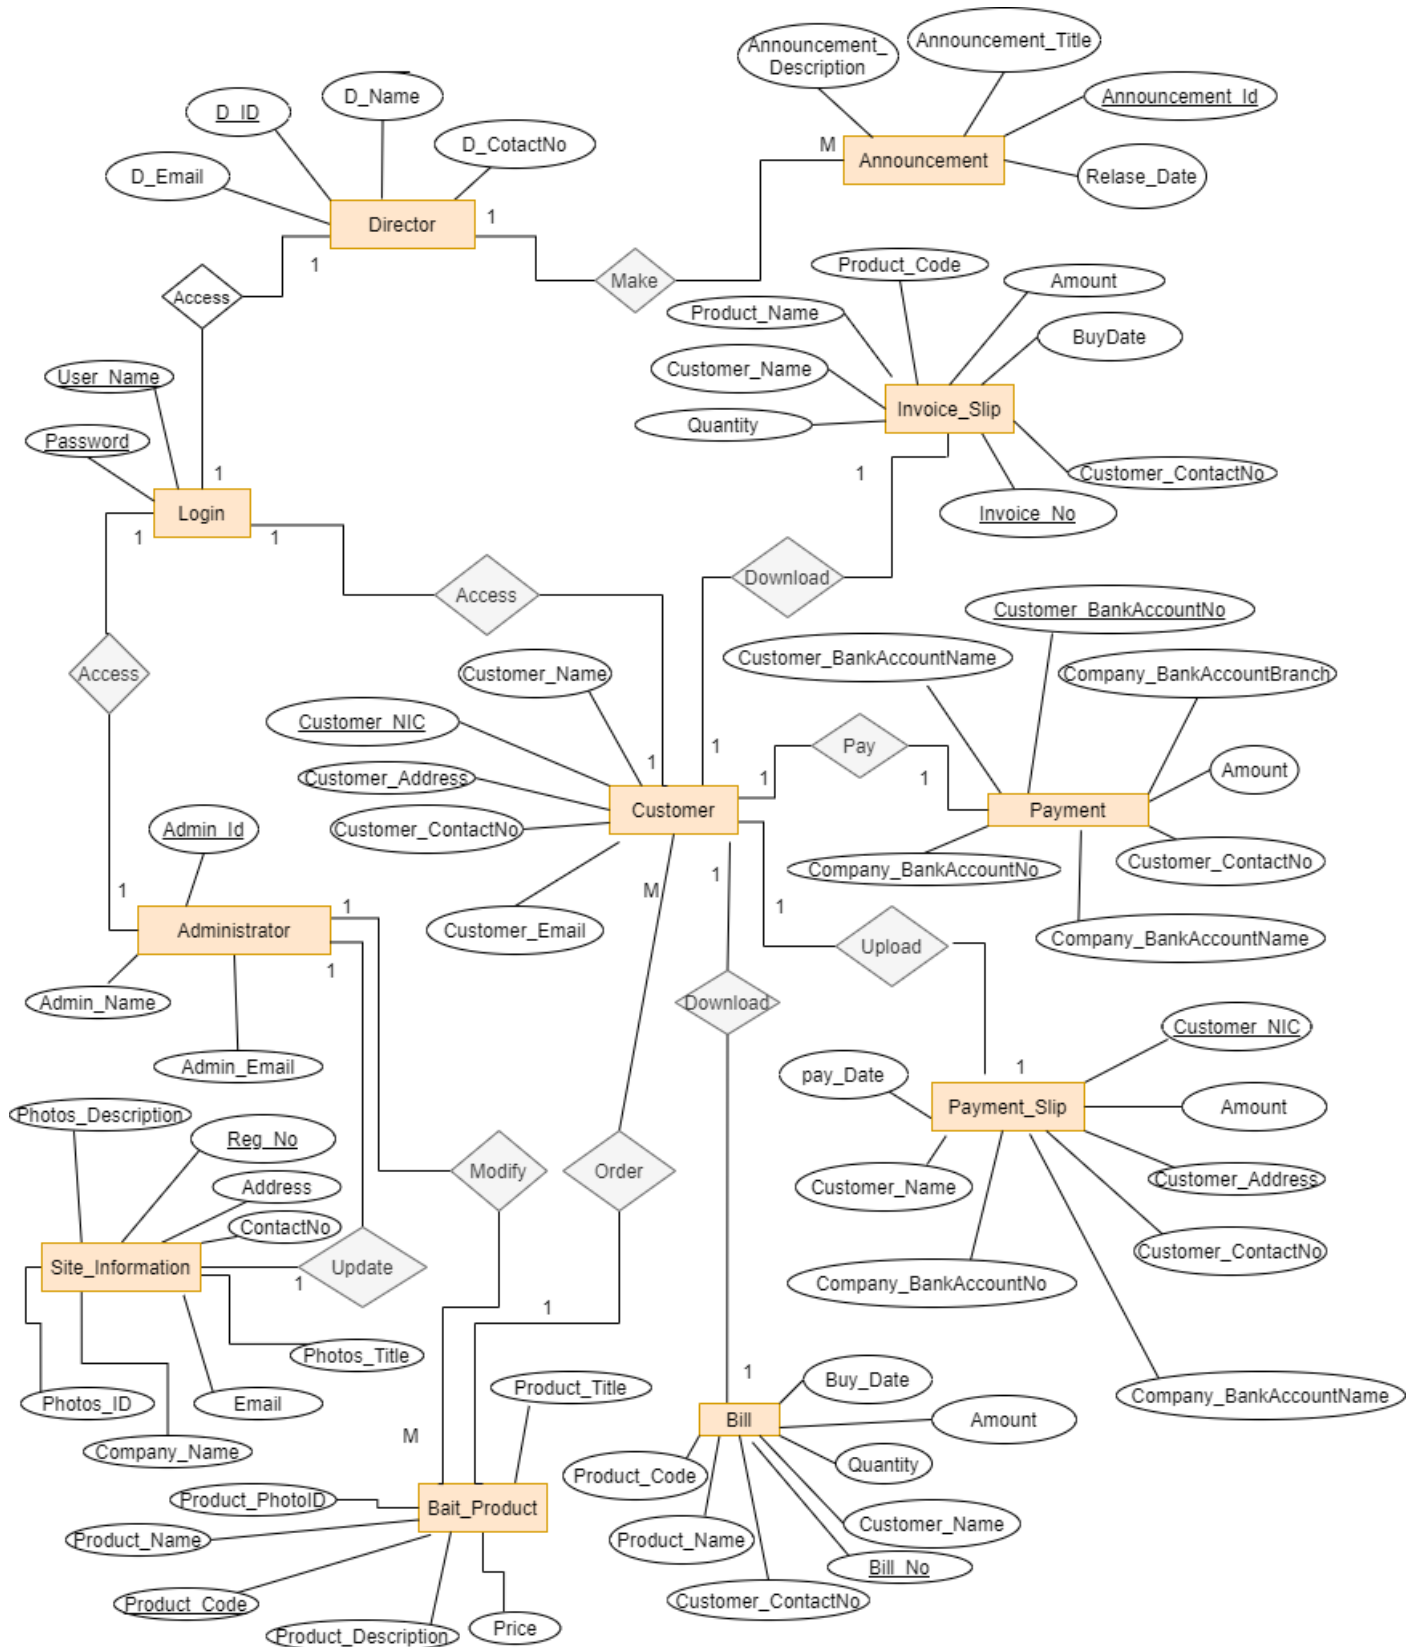

Admin :

Customer :

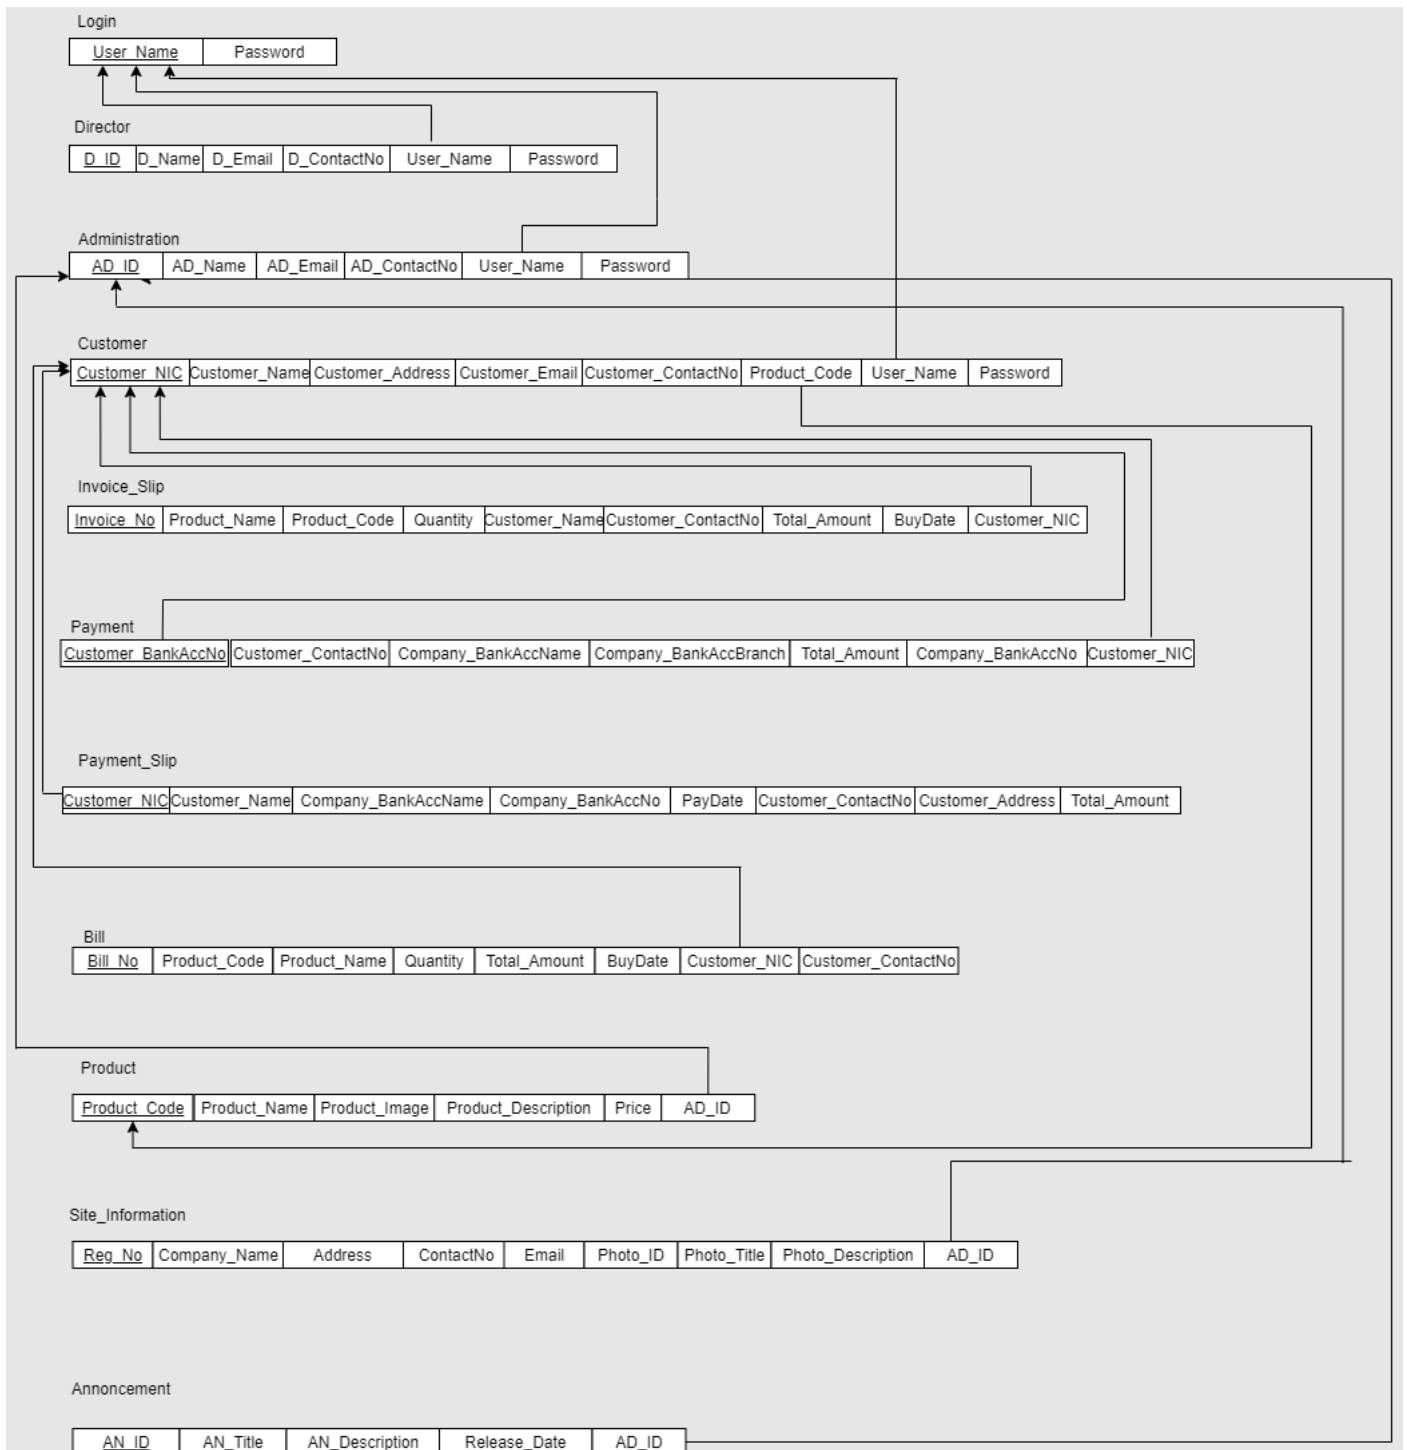

3.1 Entity Relationship Diagram

Assumptions of the Entity Relationship Diagram:

1. The invoice slip is given to the borrower customers and customers who make payments to bank account.
2. Customers means those who buy bait products.
3. Customers need to register with the company before purchasing products.
4. The payment slip should be uploaded only when making a payment to the bank.
5. Customers buy only one items at a time.

3.2 Relational Schema

- First we met with the owner of the company and got the necessary details and made a proposal for the web based system as they wanted.
- Then drew the relevant diagrams. (Use Case Diagram, Class Diagram, Activity Diagram, ER Diagram, Relational Schema, Flow Chart)
- After that we designed interface our web based system.
- So we developed front end of the Home page, About page, Contact us page, Account page and Product page.
- And then we developed front end of the payment method and cart.
- Then we developed front end of the Admin Dashboard & Customer Dashboard.
- Databases are under construction.

P.R.I. SEAFOOD

"THE BIGGEST TUNA BAIT IMPORTER IN SRI LANKA"

P.R.I. Seafood (Pvt) Ltd is one of the leading seafood exporters and importers in Sri Lanka. Since its inception we have grown our business with the world's 6000. Bigeye Tuna

ITEM CODE : E002

Price Negotiable

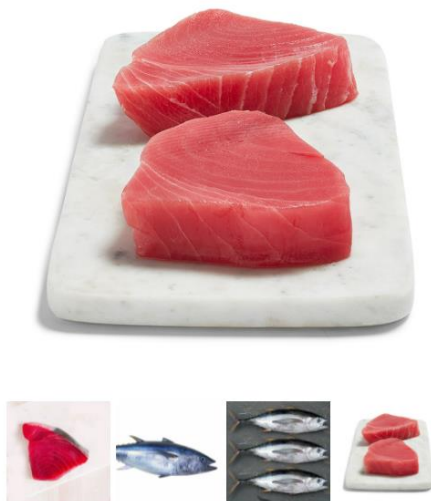

Stock-available

Product Details

Bigeye Tuna (*Thunnus obesus*) is a true tuna of the genus *Thunnus*, belonging to the wider mackerel family *Scombridae*. It is generally recognized as an important food fish and prized recreational game fish. Bigeye Tuna is one of two species known as Ahi in Hawaiian – the other being the Yellowfin Tuna. They are found in the open waters of all tropical and temperate oceans, except the Mediterranean Sea. Their maximum weight can exceed 150kg (330lb), with the all-tackle angling record standing at 178kg (392lb). This product can be supply in chilled or frozen type for human consumption.
